

DMD

Doctor of Dental Medicine

in partnership with A.T. Still University Missouri School of Dentistry and Oral Health

If dentistry is your passion, University of Health Sciences and Pharmacy in St. Louis is here to help you put your passion into practice. Through a partnership with A.T. Still University Missouri School of Dentistry and Oral Health (ATSU-MOSDOH), three interview invitations per academic year for the Doctor of Dental Medicine (DMD) program are reserved exclusively for UHSP students.

ABOUT THE PROGRAM

ATSU-MOSDOH's dental medicine program features an innovative curriculum that interweaves core disciplines into the human systems, preclinical and dental sciences with a strong emphasis on the application of clinical medicine and clinical dentistry.

Years 1 and 2 are dedicated to the basic sciences and principles of patient care in the classroom and dental simulation exercises at the simulation clinic in Kirksville, Missouri. During Years 3 and 4, you will work in clinical environments and provide patient care at the St. Louis Dental Education and Oral Health Clinic (St. Louis Dental Center).

Candidacy Selection Requirements

To be selected for candidacy, you must meet the following conditions at the time of application:

- Demonstrate suitable academic achievement as demonstrated by the following:
 - Progress toward completion of an undergraduate degree with full time enrollment
 - Science and math GPA of at least 3.30
 - Cumulative GPA of at least 3.30
- Achieve a minimum score of 17 (overall and all subsections) on the Dental Admission Test (DAT)
- Apply to ATSU-MOSDOH through the Associated American Dental Schools Application Service by July 31
- Complete a minimum of 100 hours of shadowing or clinical experience with at least two different dentists (required)
- Provide three letters of recommendation, including letters from a dentist and an advisor or college-level science instructor
- Letter of endorsement on file from an advisor from the University before September 30

Prerequisite Courses

- Biology with lab (8 credits)
- Human Anatomy (3 credits)
- General Physiology (3 credits)
- Chemistry with lab (8 credits)
- Biochemistry (3 credits)
- Organic Chemistry with lab (8 credits)
- Physics with lab (8 credits)
- English (3 credits)

RESEARCH OPPORTUNITIES

At University of Health Sciences and Pharmacy in St. Louis, students at every level have opportunities to engage in meaningful research alongside expert faculty and clinicians — and the opportunities are growing.

Research funding at UHSP quadrupled from \$2.39 million in 2018 to \$9.15 million in 2019.

In 2019, we also ranked No. 1 among all private pharmacy institutions in the American Association of Colleges of Pharmacy's (AACP) most recent Funded Research Grant Institutional Rankings Report.

In addition to science- and humanities-based faculty research, faculty at UHSP are fighting the opioid epidemic and improving patient care through work at the Center for Clinical Pharmacology and Center for Health Outcomes Research and Education.

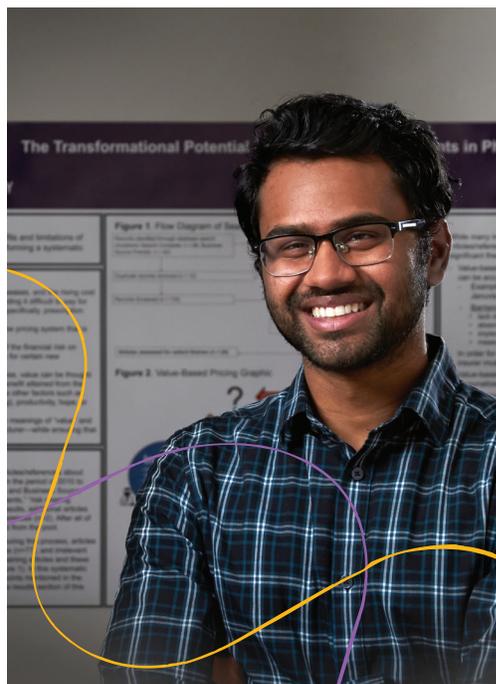

HANDS-ON EXPERIENCE

Explore all that health care offers through internships, research programs and cocurricular experiences at locations within the Washington University Medical Campus and throughout St. Louis.

Our students gain hands-on experience at locations such as:

- Washington University School of Medicine in St. Louis Department of Radiation Oncology
- SSM Health Behavioral Health at DePaul Hospital – St. Louis
- Center for Clinical Pharmacology
- Missouri Baptist Medical Center
- John Cochran Division Veteran Affairs St. Louis Health Care System
- Siteman Cancer Center at Barnes-Jewish Hospital and Washington University School of Medicine

STUDENT RESEARCH SYMPOSIUM

Since 2009, the University's annual Student Research Symposium has given students an opportunity to present and be recognized for their research work.

Past topics include:

- Signaling molecules in platelet aggregation
- Non-conventional, non-covalent interactions
- Therapeutic benefits of computers
- Efficacy of peer tutoring on biology students
- Modeling compounds
- Drug database mining

Over the past decade, more than 400 students have showcased their work.
