

BACHELOR OF ARTS

Global Health

ABOUT THE PROGRAM

Help build a better world and solve society's most pressing health care challenges. Our Bachelor of Arts in Global Health program prepares you to understand global health issues, engage in academic research and become a professional with international competencies.

STUDENT OUTCOMES

With a bachelor's degree in global health, you can use your knowledge on health issues impacting global populations, solve problems and improve patient care, both locally and around the world. Put your skills to work in careers such as:

- Policy analyst
- Researcher
- Junior executive in governmental and nongovernmental organizations or in the private sector

In our global health program, you'll build the skills you need to succeed, including:

- Ability to systematically explore and analyze situations before accepting opinions or formulating conclusions
- Understand how to present information and research to diverse audiences
- Ability to address and understand the concerns of people from various backgrounds
- Research skills related to current and relevant global health issues

ADVANCED OPPORTUNITIES

Your undergraduate education can serve as the foundation for graduate and advanced study in fields such as:

- Global Health
- Patient Care
- Health Care Administration
- Occupational Therapy
- Public Policy
- Research
- Medical Humanities
